

MAT/OCC ABOVE KANDAK 13-01: 09–18 April 2013

The Above Kandak MAT/OCC AT Training Event is the NATO sponsored part of the pre-deployment training for MAT OCC AT taking place at NATO JFTC Bydgoszcz.

It provides the Training Audience the unique opportunity to attend the process of command and control and, if required, of supporting the operational planning and employment of the ANSF unit's to which they are assigned to in order to support the development of a self-sustained, competent and professional ANSF.

The Training Audience is to practice their assisting mission by interacting with representatives of ANSF who support and also participate in the MAT/OCC AT training.

As the NATO mission in Afghanistan enters more deeply into the transition process, MAT/OCC AT are becoming more important in empowering the ANSF to increasingly take over the responsibility for Afghanistan's security.

"The Joint Force Training Centre provides a significant and outstanding contribution in this transition process" – emphasizes Major General Pavel Macko, the Commander of JFTC.
