From 4-6 September 2012, Region IV Allied Command Counterintelligence (ACCI) sponsored a Cyber Counterintelligence (CI) Conference at Joint Forces Training Centre.

During the conference, representatives of several NATO member-states presented topics addressing the threats their countries have faced, and how their CI/Security services have responded to these challenges. Additionally, conference attendees talked about the areas where NATO and its member-states could adjust or develop laws and policies which would aid in addressing the hostile threats facing NATO member-states collectively and individually. The goal of the conference was to take care of areas of concerns, discuss policies, procedures and tactics, and to find areas of potential cooperation.
