

On 02 July 2012 LTC Wojciech Czerwinski, the NCSA Squadron Bydgoszcz Commander, lead a ceremony that marked the activation of the NATO Communications and Information Agency (NCIA) in JFTC, which replaces the former NCSA Squadron.

The NCIA has been created by the decision of North Atlantic Council and became effective on 01 July 2012. The agency is a part of the NATO Communications and Information Organization consisting of an Agency Supervisory Board (ASB) and the NCI Agency.

NCIA has been formed by combining the current NATO Consultation, Command and Control Agency (NC3A), NATO Air Command and Control System Management Agency (NACMA),

NCI Agency Activation in Bydgoszcz - Joint Force Training Centre

Active Layered Theatre Ballistic Missile Defense Programme (ALTBMD), CIS support element from NATO HQs and NATO Communication and Information Systems Agency (NCSA).

It is the legal successor of the constituent elements with all their rights and obligations and continues the execution of all current missions and tasks. In particular, it supports military operations and the delivery of programmes and projects. In the future following internal restructuring and optimization of its structure the NCI Agency will seek for higher efficiency and in turn will offer a better level of service at a lower cost for customers.

NCIA in JFTC provides key support to the JFTC as it operates all its computer systems and networks necessary for daily life of the centre as well as the execution of all training activities and exercises.
